Recycling – Where and What It Pays

Material	Collected at	Pays per kilo
Paper	Curb	NT\$3
Glass	Curb	NT\$0
Metal	Center	NT\$12
Plastic	Center	NT\$5

M: Please look at the printed recycling table while I explain. Notice that only two of the four materials are collected at the curb; the other two must be taken to a center. Metal earns the highest payment per kilo, which is why thieves sometimes take it from building sites. Glass earns nothing at all, but the city still collects it because burying glass wastes space in the dump forever. Paper sits in the middle, and its price rises and falls with demand.
